## INCREASE PRODUCTIVITY EFFICIENT TROUBLESHOOTING

### **Identify Critical Changes**

Beaconsuite<sup>™</sup> DataresQ empowers application support personnel to troubleshoot data issues with extreme efficiency. DataresQ can find the needle in the haystack.

Application developers use DataresQ to assess the impact of coding changes on how data is written into tables, and how the tables are built.

Beaconsuite<sup>™</sup> DataresQ's ability to delve into database differences results in a reduction of effort for support personnel and application developers saving time and money.

BENEFITS

Saves time and money by preventing change orders due to excessive time spent troubleshooting database issues

o—o

Surfaces key information assisting with database upgrade assessments, and upgrade Quality Assurance checking

Accelerates the advancement of application expert knowledge by informing personnel of what is really going on in the database when changes are executed via an application frontend or by programming

Identifies table row count differences, row differences, and data differences on each row

Identifies table structural differences

User configured synonyms enables only relevant differences to be reported

Findings are easily exported to CSV files

o—o

Compares two databases; compares combinations of Oracle, MS SQL Server, MS Excel

Able to create a database snapshots for future comparisons
