

MAKE IT EASY TO SEARCH, VIEW AND PRINT I&C DELIVERABLES

SAVE TIME AND MONEY – SIMPLIFY

Beaconsuite™ InfoGen makes it simple to find and view Instrumentation & Controls (I&C) information stored within SPI databases. Quickly batch print and save PDF files, even if across different projects.

Beaconsuite™ InfoGen efficiently guides 'view only' users through the process of locating, viewing, batch printing, and batch PDF generation of SPI deliverables. InfoGen reduces confusion by providing answers to many complex questions such as: What project has the version of the deliverable I need? What report style should I be using?

Beaconsuite™ InfoGen's navigation capabilities help identify the correct deliverable version to use and saves significant time associated with searching for the information and printing the deliverables.

BENEFITS

Makes it easy to find information that is stored in the SPI database, even if spread across projects

Batch prints deliverables with intelligent names to PDF files

Batch prints deliverables to a printer

Navigate through the many SPI deliverables via relationships

Display selected deliverables for easy viewing

Can be used to generate SPI PDF files for uploading into Document Control systems

FEATURES

View, print, save the following deliverables as PDF files: Instrument Specifications, Loop Drawings, Panel Strip Drawings, and Foundation Fieldbus Drawings

Quickly generate 1000's of deliverables in bulk

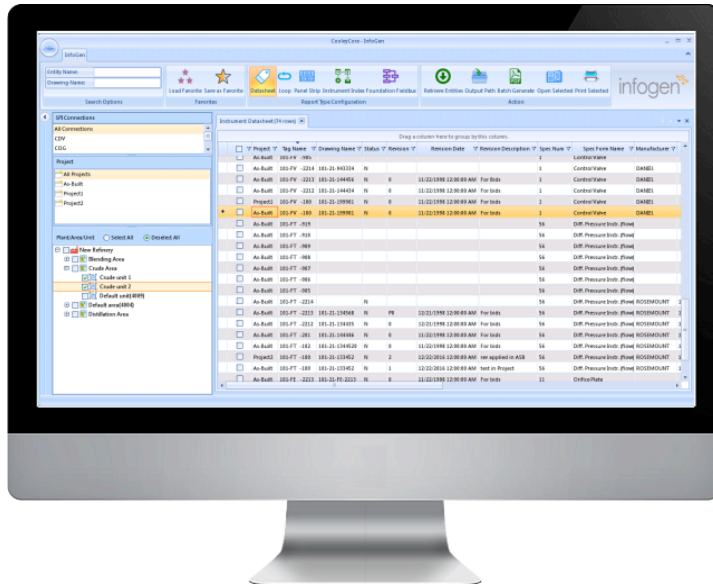

Automation intelligently names the PDF files

Displays the most current revision of each deliverable across all projects and As-Built

Easy to use Excel-like results grid

Simple interface designed for all to use

Entity Name: 101-FV-100
