# beaconsuite™ DATA CONTROL

MANAGE TAGS AND DELIVERABLE REVISIONS USED IN YOUR PROJECT

Efficient Tag and Revision Management

Beaconsuite™ Data Control supports tag and revision management for concurrent SmartPlant Instrumentation® (SPI) projects. The application is fully integrated with SPI, providing confidence that the tag names being provided to projects are truly available for use.

Data Control's simple and integrated approach to booking tags reduces the needs for high-end expertise and saves time and money.

Manage your tags & revisions associated with concurrent projects to avoid safety incidents created by duplicate tags, and/or staff working with the incorrect deliverable version / revision.
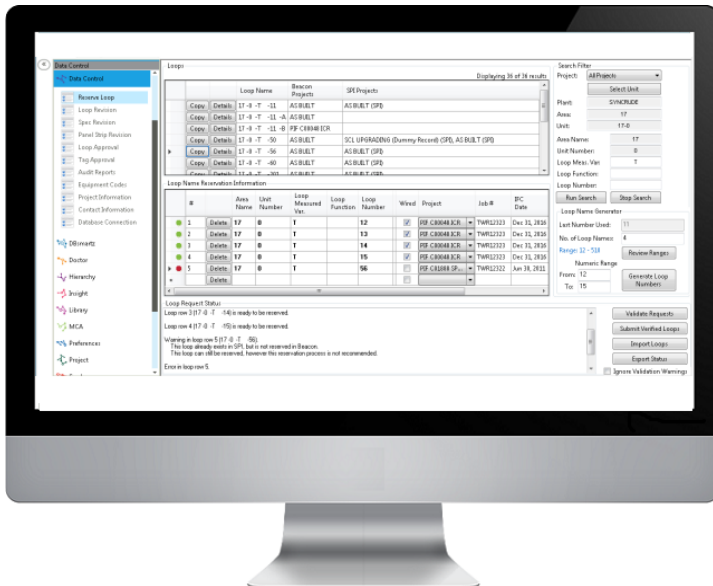

BENEFITS

Quick turnaround on tag and revision requests

Effective solution for tag and revision management

Avoid change orders due to projects clashing over tags and/or revision sequences

Keeps you informed of tag and revision management non-conformances and project completion milestone timelines (schedule)
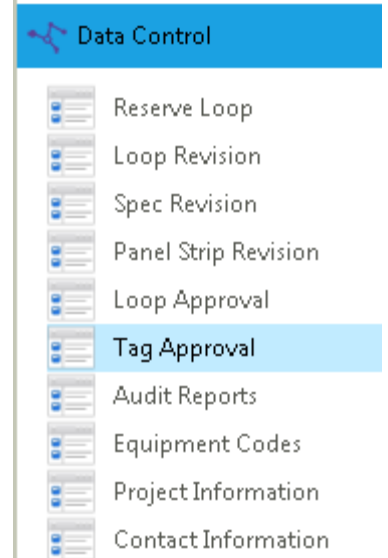

FEATURES

Reserve loop names, approve loop names, tag names and panel names

Significantly reduce manual, time-consuming work

Real-time integration with SPI

Audit adherence to naming standards

Reserve names in bulk

Search for tagging gaps (specify the size of gap required)

Passively monitor/audit projects; provides the ability to approve non-conformances
