# beaconsuite™
STANDARDS MANAGER

QUICKLY ASSESS & REPORT SPI STANDARDS ACROSS MULTIPLE SPI DOMAINS

STANDARDIZE THE SPI EXPERIENCE - IDENTIFY CHANGES

Beaconsuite™ Standards Manager assists companies in their drive to provide a consistent SmartPlant Instrumentation (SPI) user experience across the company (across multiple domains/databases); simplifying generation of SPI deliverables.

Beaconsuite™ Standards Manager enables projects to work with an offline copy of your corporate standard and assist with monitoring the project deviations to the standard; just request a periodic copy of the database and run Standards Manager to assess all changes.

Beaconsuite™ Standards Manager reduces the need for high end expertize, saves time and makes it simple to assess the alignment of SPI standards.

BENEFITS

Rapidly assesses the alignment of standards across two different databases; without this application, it would take many more hours to do the same assessment

Application to be used to determine the required effort in order to merge (blend) different SPI databases

Non-conformances between the two databases can be reviewed and approved (if required)

Assess high priority separate from low priority standards

FEATURES

Dashboard includes pie charts and a bar chart that quickly summarizes the current standards alignment status
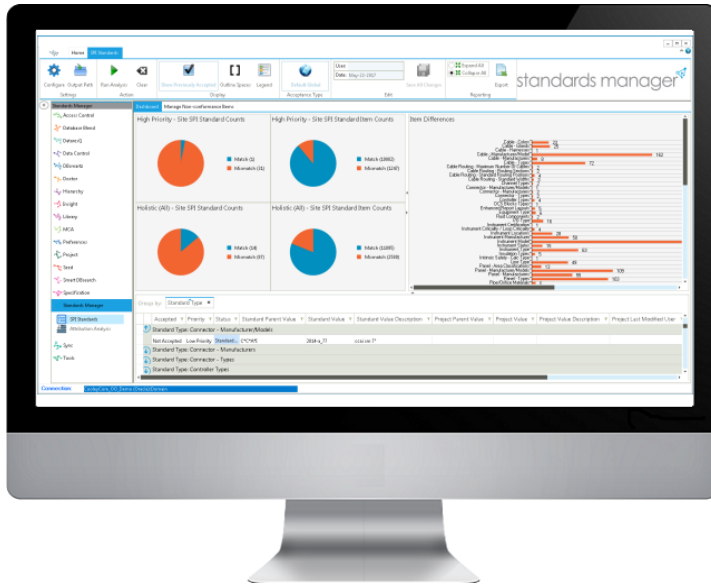

Click on a bar chart to view details

Export the dashboard graphs and results to MS Excel

Approve and unapproved non-conformances per domain

Easy to use MS Excel like results grid, which enables easy filtering and grouping of results
